

LIST OF Confirmed Contributions and Contributors, so far

- 1 "Daniel Leivant"  
A pedagogical completeness proof
- 2 "Antonio Sarasa Cabezuelo"  
Propositional Logic Learning Objects
- 3 "Rita Bijlsma"  
An interdisciplinary Subject Spanning Analysis, Communication and Logic
- 4 "Minica Stefan"  
minica@euro.ubbcluj.ro  
Implementing Alternative Explanations in Interrogative Inquiries and Dialogic Games
5. "Laszlo Aszalos"  
Online Logic examples
6. "Bertil Rolf"  
Logic Software for Apprenticeship in Rough Reasoning
7. "Raymundo Morado"  
The research on the teaching of Logic: Topics, disciplines, and groups.
8. "Luis Sanchez Grailllet"  
A Logic for Historians?: An Analysis of the Possible Role of Logic in  
Historiographic  
Research
9. Víctor Florencio Ramírez Hernández"  
Aprendizaje de Lógica en ECA
11. "Andreas HERZIG" "Olivier Gasquet"  
LoTRC: An environment for experiencing Kripke Semantics
12. "Enrique German Hernandez-Manfredini "  
The Halting and some related Problems in TM's  
A Teaching Aid for Building Proofs in Propositional Calculus
13. "Agustín Guijarro"  
Zenon. Software to learning of propositional Logic
14. "Theo Janssen"  
Logic as a Language for Modeling
15. "Lodder, Josje"  
An interactive tool for manipulating logical formulae
16. "Martha Evelia"  
WHY MUST LEARN LOGIC?  
EXPRESSIONS OF ALUMN@S OF THIRD SEMESTER OF TECHNOLOGICAL BACCALAUREATE  
Exercises to develop abilities of the formal logical thought
17. "Hans VAN DITMARSCH"  
Learning Logic Programming with ART
18. "Ludmila Dostalova"  
ORGANON: Web Application for Basic Logic Courses
19. "Krysiá Broda"

Pandora: Making Natural Deduction Easy

20. "Rein Prank"

Trying to cover the exercises with reasonable software

22. "Ekaterina Ovchinnikova"

Morph Moulder: Graphical Software for Teaching and Visualizing Logic for HPSG and

Description Logic

23. "José Pedro Úbeda"

Must a mathematician learn Logic?

24. "Dave Barker-Plummer"

Courseware for Introductory Logic: Language Proof and Logic

25. "Levi Ignacio Zerpa"

INTRODUCING MONTAGUE SEMANTICS THROUGH THE FRAMEWORK OF TARSKI'S WORLD 5.0

27. "Brendan Larvor"

The case for teaching syllogistic logic to philosophy students

28. "John Baldwin"

Geometry and Proof

29. "Angel Nepomuceno"

Logic: a bridge between sciences and humanities

30. "Fernando Soler"

easylogic: an interactive web interface to theorem provers

31. "Ioan Scheau"

A key for teaching the logic issues from Ludwig Wittgenstein's "Tractatus

Logico-Philosophicus". The issue of the foreword.

32. "Francisco Salguero"

Basic Logical Tools in a First Approach to Language and Linguistics for Spanish

Students

33. "Enrique Alonso"

Question-answering for e-Learning

34. "Johan van Benthem"

What Should Every Student Know About Logic? Rethinking the Core Curriculum.

35. "Patrick Blackburn"

Representation and Inference for Natural Language

39. "Raquel Sánchez Díaz" "Belén Pérez Lancho"

Visual ITP

40. "Elena Jorge"

MAFIA: Semantic tableaux resolution

41. "Miguel Ángel Cruz Mavil"

On students' difficulties in conclusions entailment since natural and educated

abilities opposition

42. "Rodolfo Ertola"

Some Issues in the Teaching of Logic

ponenci asparaweb

43. "Miltiadis Kokkonidis"  
A Simple Linear First-Order Type System for Meaning Assembly
44. "Ana de la Viuda"  
Modelos de Kripke
45. "Manuel Antonio Goncalves Martins"  
Applying Abstract Algebraic Logic to Behavioral Reasoning.
46. "Ana Gil"  
Semantic Web: Building the Logical Web
